

BAMBOO PLUSH

Bamboo is a sustainable natural fiber, having numerous environmental benefits and advantages:

- It is grown without the use of chemicals or pesticides and is rapidly renewable; meaning it grows again in a short period of time.
- Bamboo requires very little water and in most cases needs no additional irrigation besides rainfall.
- Bamboo yarn is made from the pulp of the bamboo plant.
- The woven fabric is easy to dye, without the use of chemicals and less water than conventional dyeing methods.
- Bamboo fabric is naturally biodegradable, antibacterial, and hypoallergenic.
