Care 4

MAINTENANCE INSTRUCTIONS FOR SOLUTION DYED NYLON AND 100% POLYESTER FABRICS WITH NANOTEX:

Cleaning Code WS + BC: Clean with mild detergent or shampoo, foam or water-free solvent as desired. Do not saturate with liquid. Pile fabrics may require brushing to restore appearance. Cushion covers should not be removed and dry cleaned or laundered. Diluted bleach solution can be used, if needed for disinfecting.

- Clean liquid spills quickly with a dry clean cloth.
  For liquid spills, gently blot (don't rub) spill immediately with an absorbent cloth while spill is still fresh. Wipe off with clean water and a dry clean cloth if needed.
- For semi-solid spills, try to lift the spot off of the fabric.
  Working in a circular motion or removing the spill from the side is often the best means to lift spills from the fabric. Change towel surface frequently until spot has been transferred off of the fabric and onto the absorbent cleaning cloth. (Try to avoid pressing the spill or spreading the stain.) Wipe off with clean water and a dry clean cloth if needed.
- For stubborn spills: If a spill does not come off with water and a dry clean cloth, add a mild detergent mixed with water and repeat circular motion. (Mild detergents such as Sport Wash, Tide Free, or Cheer Free)
  If a stain remains, a solvent may be needed to remove the stubborn stain. It is recommended to use odorless mineral spirits, dry cleaning fluid or Fantastik orange action degreaser and cleaner commercial line.
- 20% Diluted bleach solution can be used on fabrics that are solution dyed and 100% Polyester only.
- Wipe off with water and a dry clean cloth. (Do not rub harshly. The harder you rub when cleaning a spill, the deeper the soil can penetrate between the fibers.)
  Remove all soap residue from the surface with clean water.
- Please be careful: These instructions are for the fabric only. Some fabric cleaning methods may cause damage to underlying materials used to make the furniture item.
