MAINTENANCE
INSTRUCTIONS FOR
CASTING
POLYURETHANE (CPU)

Cleaning Code WS + BC: Clean with mild detergent or shampoo, foam or water-free solvent as desired. Do not saturate with liquid.

Stain Treatment and Spot Cleaning

- A professional cleaning service is recommended
- Treat stains quickly
- It will become increasingly difficult to remove the longer a stain is allowed to set
- Pretest any cleaning method or agent in a small hidden inconspicuous area
- Several less concentrated applications are less damaging than one concentrated application Remove fluids immediately by blotting with a clean, colorfast, absorbent cloth Flush stain with water and dry with clean cloth Rinse all cleaning agents thoroughly with water and wipe with a soft cloth
- Residue left by cleaning agents will degrade and shorten the life and/or affect the product's appearance if not removed. Remove solid or semi-solid substances
- Using a flat object, remove as much of the stain as possible
- After removal, vacuum thoroughly using the proper attachments before cleaning with an agent Abrasive household cleansers and steel wool should be avoided Bleach Cleanable
- To disinfect spray a 4:1 ratio water/bleach mixture on the fabric and allow to linger for the time specified by the Centers for Disease Control and Prevention. Rinse all cleaning agents thoroughly with water and wipe with a soft cloth
- **Rinse all cleaning agents thoroughly with water and wipe with a soft cloth**
- Residue left by cleaning agents will degrade and shorten the life and/or affect the product's appearance if not removed.

Approved Cleaners

This list represents some of the most common options available and is not intended to be comprehensive. All listed cleaning products are EPA-approved for use against the virus that causes COVID-19.
