Care 32

MAINTENANCE INSTRUCTIONS FOR WALLCOVERING WITH SYNTHETIC FIBERS BLEACH CLEANABLE

Cleaning Code WS + BC

Clean with mild detergent or shampoo, foam or water-free solvent as desired. Do not saturate with liquids.

- All stains should be treated blotted out immediately with clean water, and soft absorbent cloth (white) or sponge.
- A mild detergent solution with warm water or water-free solvent can be used for tougher stains, being careful not to flood the surface.
- Abrasive rubbing of spots should be avoided, discoloration and delamination may occur.
- Great care should be taken in cleaning any dark colors because of the possibility of causing "light marks".
- 10% Bleach solution can be used for surface disinfecting.
- Occasional vacumming is acceptable and will maintain look.
- Consult with a professional cleaning service for more difficult stains or when overall cleaning is needed.
