Care 7

MAINTENANCE INSTRUCTIONS FOR FABRICS WITH NATURAL FIBERS:

Cleaning Code S: Clean only with a water free cleaning solvent. Do not saturate. Do not use water. Pile fabrics may require brushing to restore appearance. Cushion covers should not be removed and dry cleaned.

- Quickly blot up fresh spills with dry towel to avoid deep penetration of the stain.
- Pretest a small area before proceeding. When using a solvent or dry cleaning product, follow manufacturer's instructions carefully and clean only in a well-ventilated room.
- Use a professional furniture cleaning service for persistent stains and when an overall soiled condition has been reached.
- If the customer chooses to self-clean only a mild pure water-free dry cleaning solvent may be used. The use of water may leave permanent stain or spot.
