

Boost Ottoman
featuring Xorel Knit

Carnegie Space

IN GOOD COMPANY

Creative curiosity is inherent to Carnegie, as is our commitment to quality, performance, and sustainability. As a design company focused on driving innovation, we are dedicated to the development of high performing, environmentally responsible materials for building interiors. That steadfast commitment has led to breakthrough fabric introductions, such as Xorel and Xorel Biobased, that are unrivaled in form, function, and environmental performance.

Based in New York City, the Carnegie Creative Studio is dedicated to exploration, research, and material innovation. Our talented and diverse team includes textile designers, weavers, painters, and graphic designers committed to examining new technologies. This commitment allows us to create bespoke materials for our clients—an ability unsurpassed in the industry. We invite you to visit when you are in the area and discover the possibilities of partnering with Carnegie.

Carnegie is a
Certified B Corporation

B Corp certification is a rigorous third party assessment performed by the non profit organization B Lab. B Corporations are a new kind of company that uses the power of business to solve social and environmental problems.

Carnegie is a
PVC Free Company

Carnegie was the first and remains the only dedicated PVC Free company in our industry. Our mission is to work tirelessly to replace vinyl products with more environmentally intelligent materials.

BOOST OTTOMAN

Introducing Boost – the first furniture piece launched under Carnegie’s new Space division. Carnegie Space is committed to designing and launching problem solving products that are beautifully designed and easy to install. Designed in collaboration with Rainlight Studio, we took up the challenge of creating a unique seating form based on Carnegie’s new Xorel Knit. The result is Boost Ottoman, a playful and colorful multi-layered form with innumerable design options.

FORM FOLLOWS FABRIC

Besides its unique shape, what sets Boost apart is the textile it was designed around – Xorel Knit. Its high-performance character makes Boost perfect for high-use areas where the wear and tear of the workplace, health place or hotel space can take its toll. Xorel Knit covers Boost with the ability to resist abrasion, punctures and stains.

PERFORMANCE FOR DEMANDING SPACES

All commercial interiors are demanding on furniture. Boost was created to be durable and stylish in any space where people gather, create, and collaborate. The Boost Ottoman is built tough and doesn't mind being pushed around... quite literally.

EXCITING DESIGN OPTIONS

Perfect for any space that needs flexible seating options, Boost Ottoman is suitable for use in a variety of environments. It comes standard in five different pattern-ways, but with customizability of Xorel Knit application, we have the flexibility to design pieces that are truly unique.

SPECIFICATIONS

BOOST OTTOMAN

WHY XOREL KNIT

Xorel Knit is a breakthrough material that leverages the exceptional performance and beauty of Xorel with the application versatility of a knitted textile. Specifically engineered to upholster, it has the flexibility to hug the dramatic shapes of modern furniture. The remarkable combination of functionality and sustainability makes Xorel Knit a textile like no other.

To create Xorel Knit, the Carnegie Creative team became completely immersed in building a one-of-a-kind knitting machine that would produce a textile unlike any other in the brand's 38-year history. This textile is designed first and foremost for upholstery use: with the ability to wrap and hug extremely complex curves.

Xorel Knit exceeds 250,000 double-rubs in abrasion. Xorel is solution dyed, bleach cleanable without any added coatings or finishes, and is even puncture resistant when upholstered. It is Cradle to Cradle certified at the Silver level.
