The HPD Standard is solely a declaration of product content and direct health hazards associated with exposure to its individual contents. It is not a full assessment of environmental impacts from the life cycle of this product. It is not an assessment of risks associated with actual use of the product. It does not address the potential health impacts of substances used or created during manufacture that do not appear in the final product as residuals, nor substances created during combustion or other degradation processes.

This Health Product Declaration was generated following the requirements of the noted Standard version and is valid for a total of three years after date of issue or three months after a substantive change of product contents occurs. Users should verify that this Health Product Declaration is compliant with the most current version of the HPD Standard. Accuracy of claims made in this Health Product Declaration is the sole responsibility of the listed manufacturer and certifier (if applicable). The HPD Collaborative does not warrant any claim made herein, explicit or implicit. The HPD Standard is an "open standard" developed and managed by the HPD Collaborative, a nonprofit organization. NOTES

Trevira constantly reviews the necessity to use toxic and intensively migrating substances in its manufacturing processes. Where at all possible, the use of such substances is avoided. The number and volume of chemicals required is reduced to a minimum during storage and in actual use. Dangerous chemicals are, wherever possible, replaced by less hazardous products and ones that are more environmentally friendly. Suppliers are requested to declare environmental compatibility for dyestuffs employed. Hazardous waste materials are where possible recycled: chemicals are sent for external processing.
