**FLAME RETARDING**

Fabrics identified as inherently flame-retardant (IFR) meet the requirements of the NFPA 701 standards as well as many local tests. Most fabrics which are not inherently flame retardant can be chemically processed to pass the same tests.

It is solely and entirely the customer's responsibility to determine which tests apply at the place of installation and whether the fabrics specified meet the flame-retardant requirements of that locality.

**WALLCOVERING  
INSTALLATION  
INSTRUCTIONS**

Suggested procedures for Wallcovering Installation are included in every roll of wallcovering material shipped. It is important the installer read these before proceeding. These are also available upon request through our Client Experience department or web site.
